Introduction to Unity

Unity is the world's leading platform for creating and operating interactive, real-time 3D (RT3D) content. We empower creators across industries and around the world by giving them the knowledge and the platform to create innovative games and RT3D experiences for almost every industry. Creators around the world are passionate about Unity. Every day, they create and publish amazing games and experiences and share them with the world:

- 50%+ of games across mobile, PC, and console were made with Unity
- 5B downloads per month of apps built with Unity
- 72% of the top 1,000 mobile games were made with Unity

Algoma and Unity are partnering to bring you world-class training and certification opportunities in real -time 3D technology through the Learner Fast-track program

The Learner Fast-track prepares learners to attain **Unity Certified Associate (UCA) Game Developer** status through a series of real-time online instructor-led workshops for a total of 30 hours, followed by courseware for self-study to help you prepare for the exam as well as an exam voucher.

| **Unity Certified Associate (UCA) Game Developer Course** | The Unity Certified Associate (UCA) Game Developer course is for you if you are interested in game design and development, programming, 2D and 3D modeling, VR/AR, and if you are looking to gain skills to become a digital professional. All Unity Certifications are the result of deep collaboration between Unity, subject matter experts from 3D, interactive, and gaming industries, and testing-design specialists.

 Topics include:
 Game Objects and Assets \| Assembling the Game Level \| Lighting in Games \| Animating Game Objects in the Unity Editor \| Scripting in Game Development \| Implementing Navigation and Pathfinding \| Building the Player, Allies, and Enemies |

Becoming Unity Certified demonstrates to employers that you have the technical skills and applied knowledge in the areas of expertise they need and can support you in a career creating content using Unity.
